

AWESOME ALL STAR NEWS

Science School

By Khanh and Room 16

On February 19, about eighty fifth graders at Azevada went to Science Camp in Monte Toyon near Santa Cruz. Students who went to Science Camp stated that it was an entertaining and a superb experience.

Mrs. Gillet, our teacher, decided to recreate the hilarious skits, rip-roaring fun games, and joyous songs at Science Camp and establish Science School for those who didn't go to Science Camp.

First off, we did some hysterical skits. For example, we did what we called "The-Three-Headed Student". It is a skit that is related to the skit to "The Three-Headed Naturalist" performed at Science Camp by Mrs. Gillet, Ms. To, and Mr. Reyna. The thing is that you have to be quickly accustomed and finish a sentence word by word with your partners. Maybe and just maybe, "The Three-Headed Student" can make it into the talent show as a comedy skit!

In addition, we played some rip-roaring fun games from Science Camp in Science School. Our favorite game so far is called Camouflage. Camouflage is primarily like hide and seek but in the woods. The difference is the seeker can't cross an invisible circle around them. At last, the seeker will raise his or her hand which has as many fingers as the secret number. If the hider knows what the secret number it at the end of the game, they win.

Last but not least, we sang some superb and joyous songs. One of the songs we sang in our Science School is "Banana Slugs". The song has a laugh-a-minute chorus, and a myriad of upbeat lyrics. Another song we sang is called "Shooting Stars". It is a sad song about a dear friend who passed through one's life.

Finally, we sang another song called "The Newt Came Back". It is based on an experiment Dr. Twitty did on newts.

In conclusion, Science Camp is an experience everyone should have, and we thank Mrs. Gillet for recreating the amazing experience of Science Camp at school. The rip-roaring fun games, the hilarious skits, and the joyous songs help us with our social skills. If you want to visit our Science Camp at Santa Cruz, here is the address: 9515 Soquel Dr, Aptos, CA 95003. Thank you for reading!

Deliver of Dawn
Drawn by: Aidan W. Rm 31 6th grade

The stars I twinkle,
The moon I hold.
The rain I sprinkle,
Let clouds unfold.
I shine the sun,
IT bring the show.
So day is done,
Move on to know
I let night flow.
Flow

Running Out of Time

By Maggie, Rm 16

As the wind blows
Changes flow
Each time you take a step
Shows how much time you have left
Every time it's your birthday
Means you have a second more to live
Then when the time comes
You're asleep forever.

Sibling

By Sofia C., Rm 16

A sibling is a person
Who loves you from the heart
No matter how or what

Haiku

By Kalena H., Rm 16

Saving bees is mine
My friend inspires greatly
Now that is my cause

Team

By Adam A., Rm 16

There is an I in team
or you
wouldn't be on the team.

Chocolate

By Sammy S., Rm 16

Chocolate, so sweet, makes me lift off my feet.
After one bite, it makes my day turn into bright.
Nothing can ever beat it
Well, I guess you can, if you cheat it.
Makes me happy even on the worst of days,
it makes my heart go into a blaze.
No matter how tough the day can be,
I will never get enough chocolate.

THE END

Bees

By Ashley R., Rm 16

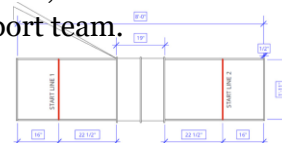

Bees, Bees, Bees
flying in the air
BUZZZZZZZZZZZZZZZZZZZZ BUZZZZZZZZZZZZZZZZZZZZ
while they pollinate
Bees, Bees, Bees,
flying in the air with no care.

Please come to root for our 5th Azevada Tech Teams as they compete in the 2019 Tech Challenge at the Tech Museum in San Jose on Saturday, March 30. They have two hovercraft prototypes that will attempt to navigate through various terrains. See you there! Om (founding member), Saumit (founding member), Saumil, Aditti, and Colin from Rm 19 and Shailesh (founding member), Kushal (founding member), Sushruth, Khanh, and James from Rm 16 with Jonathan, Luis, Adam, Raclif, and Jom on the support team.
